FRANKY R. INTERIANO

Software Engineer · Fintech & Production Support · Bilingual EN/ES

Miami, FL | (305) 600-9012 | ricky95hnd@gmail.com | linkedin.com/in/franky-interiano-info | frankyinteriano.com | github.com/rick2303

U.S. Permanent Resident, authorized to work for any employer, no sponsorship required.

SUMMARY

Software engineer with 2.5+ years building and supporting production systems in banking and payments. At a bank I supported 24/7 core banking and cross-border payments and cut international transfer processing from 8 days to 1. Today I build and run web and mobile apps end to end, including a regulated KYC/AML account-opening platform and two finance apps live on the App Store and Google Play. Comfortable owning a system after launch: incidents, root cause and fixes.

SKILLS

- **Languages & Frameworks:** SQL, PL/SQL, TypeScript, JavaScript, Node.js, NestJS, Express, React, Next.js, React Native (Expo), Ionic/Capacitor, C#/.NET, Java, Python
- **Databases:** Oracle, SQL Server, PostgreSQL, MySQL, Supabase, Redis, Prisma ORM; query tuning, data reconciliation
- **Cloud & Tools:** AWS (Lambda, API Gateway, S3, EC2, IAM), Docker, Linux, Git, Sentry, Postman, JIRA, Confluence, Power BI
- **Production Support:** L2/L3 incident response, troubleshooting, log analysis, monitoring, root cause analysis, on-call, SLAs, technical documentation
- **Fintech Domain:** Core banking, VISA B2B Connect, cross-border payments, KYC/AML onboarding, Stripe and RevenueCat billing, payment webhooks

EXPERIENCE

QALI-T | Software Engineer

Miami, FL · Remote | May 2025 - Present

- Led the engineering of a digital account-opening platform for a regulated savings and credit cooperative: biometric ID verification, national ID registry validation (SOAP) and AML/PEP screening before the member is created in the core system. Live in production.
- Built and shipped two consumer finance apps to the App Store and Google Play (React Native/Expo and Ionic/Capacitor), with in-app subscriptions through RevenueCat and web payments through Stripe, reconciled by webhooks.
- Deliver and support 8+ web and mobile applications in production: troubleshoot customer-reported issues, fix root causes in code and data, monitor with Sentry and deploy.
- Built and maintain integrations with 10+ third-party APIs (Stripe, RevenueCat, Didit KYC, Claude API, OneSignal, Resend), handling webhook and payment failures end to end.

Grupo FICOHSA (Bank) | Production Support Analyst / Backend Developer

Remote | Jul 2024 - Oct 2025

- Reduced international transfer processing from 8 days to 1 on the VISA B2B Connect flow by refactoring PL/SQL workflows, automating reconciliation and tightening escalation paths.
- Supported 24/7 core banking applications processing thousands of daily transactions, meeting SLA targets in a regulated environment.
- Handled Level 3 escalations and on-call: code-level debugging in C#/.NET and PL/SQL, hotfix deployment, root cause reports, and incident tracking in JIRA and Confluence.

PIXDEA | Jr. Software Developer & Technical Support

Tegucigalpa, Honduras | Nov 2023 - Mar 2024

- Built REST APIs on AWS Lambda + API Gateway (Node.js, Python) over MySQL to feed automated analytics dashboards, with React front-end components.

SELECTED PRODUCTS (LIVE)

- **FynQ** (fynq.site · App Store · Google Play): personal finance app with AI daily summaries, TOTP 2FA and biometric unlock. Node.js/Express, Prisma, MySQL, Ionic/Capacitor.
- **Splitwo** (splitwo.com · App Store · Google Play): group expense splitting with recurring expenses and reminders. Expo/React Native, Supabase/PostgreSQL, Edge Functions.
- **VennQ** (vennq.com): multi-tenant business suite and POS, one isolated MySQL database per company. Next.js, NestJS, Prisma, Stripe.

EDUCATION

B.S. Systems Engineering | Universidad Nacional Autónoma de Honduras (UNAH) | 2024

U.S. equivalency: Bachelor's degree from a regionally accredited institution (WES course-by-course evaluation, 2026)

Languages: English (professional working), Spanish (native)
