PROFESSIONAL SUMMARY

Systems Engineer with 2+ years building production web applications in fintech and SaaS environments. Experienced with React, Next.js, SQL Server, and REST APIs, with a background in production support that gives me a deeper understanding of how systems behave in the real world. Comfortable working across front-end and back-end in small agile teams.

SKILLS

Languages & Frameworks: JavaScript, TypeScript, HTML5, CSS3, React.js, Next.js, Node.js, Java, Python, C#, .NET 4.6 framework.

Databases: SQL Server, Oracle, MySQL | SQL, PL/SQL, data validation & reporting.

Tools & Cloud: AWS (Lambda, API Gateway, EC2, S3), Tailwind CSS, Power BI, JIRA, Confluence, Git.

Methodologies: Agile / Scrum, Waterfall.

Languages: English (Professional Working Proficiency) | Spanish (Native)

EXPERIENCE

QALI-T | Remote

Software Engineer (05/2025) – Present

- Built production-ready web applications (fynq.site, qali-t.com, olanchito.com, lz-englishacademy.com, vennq.com, pre-register.movelyq.com) using React.js, Next.js, TypeScript, and Tailwind CSS.
- Designed scalable front-end architecture and implemented backend logic with SQL-based data models.
- Integrated third-party services for identity verification and secure user workflows.
- Collaborated with stakeholders to translate business requirements into technical solutions.

Grupo FICOHSA | Remote in Honduras

Production Support Analyst (07/2024) – (10/2025)

- Optimized a key international transfer process, reducing SLA from 8 days to 1 day through SQL automation and system tuning.
- Investigated and resolved high-priority incidents using SQL, PL/SQL, and Java in a 24/7 banking production environment.
- Built backend components and automation workflows to optimize system performance across multiple banking modules.
- Collaborated in an Agile environment using JIRA and Confluence for incident tracking and change management.

PIXDEA | Tegucigalpa Honduras

Jr. Software Developer & Technical Support (11/2023) - (03/2024)

- Built REST APIs with AWS API Gateway and connected them to React front-end components for real-time data visualization.
- Implemented backend data processing logic using AWS Lambda (Node.js, Python) and MySQL to power automated analytical dashboards.
- Troubleshooted backend and data-related issues, validating data accuracy across databases and resolving inconsistencies reported by users.
- Supported a small agile team by managing tasks through Git and JIRA, contributing to both development and technical support workflows.

EDUCATION AND CERTIFICATIONS

B.S System Engineering | Universidad Nacional Autónoma de Honduras - Tegucigalpa, Honduras (2020 – 2024)

AWS Certified Solutions Architect – Associate | In progress (Expected: April 2026)
